EXPERIENCE

Oni Development

Software Development

3/18– Ongoing

- Translate user behavior and research into actionable data
- Perform usability tests and analyze the results to gauge the consumer's experience
- Enhance customer's comfortability with known payment processors.
- Develop public-facing Landing Pages across the company's various websites
- Analyze and optimize user journeys for a wide range of devices including mobile, tablet, and desktop experiences
- Creating reusable object-oriented components that follow the DRY methodology.
- Automated image optimization, using Grunt and minified JS, Lazy Loading and CSS, which reduced page load times by up to 30%.
- Streamline customer usability by creating CRUD dashboard for products.
- Optimizing tasks with automation, making the company more productive
- Manage SEO and Marketing
- Create Custom Graphics
- Use MongoDB to gather and store valuable customer information.
- Develop Scalable, Manageable and Efficient Web Apps involving scripting and web scraping

CodingOni

Freelancer

7/15 – 3/18

- Create attractive and user-friendly web pages and mobile-app functionality
- Convert Wireframes into functional pages
- Optimized performance so pages would load quickly, decreasing the bounce rate and retain visitors.
- Perform quality control on provided site content
- Use Bootstrap and modern layout modules including Flexbox and CSS Grid to improve code readability and responsiveness.
- Implement interactivity so site visitors spend more time on the site.
- Revamped UI and app interface for a customer.
- Implement form for easy accessibility of users
